NATURAL PLASTERS & PAINTS

Inspired by the raw beauty of Italy, Italian Decorative provides an extensive range of colours for you to bring your imagination to life. Be it the rich earthy tones that paint the city of Venice, subtle neutrals hailing from natural marbles and limestones, or bright hues reminiscent of luxurious precious stones, they can all be achieved with our Colour Software and base colourants.

Our pigments are of the highest quality, resulting in long-lasting, opaque colours that are perfect for our mineral plasters and acrylic paints. The base colourants are used to formulate the colours from our chart using our Colour Software and, if needed, can also be adjusted to your specifications.

We will always recommend patch testing your coloured plasters and paints and allowing them to dry to accurately gauge the colours before starting your final work. Keep in mind that the colours displayed in this brochure may vary from the final result obtained by the Colour Software.
